

INVESTMENT POLICY

This policy is to establish investment objectives and parameters for the management of public funds of the Mountain Home School District. These objectives and parameters are designed to safeguard funds through the minimization of credit risk and investment rate risk, to assure availability of funds when needed and provide an investment return competitive with comparable funds and financial market indexes. This policy does not apply to funds related to issuance of debt where there are other indentures and covenants in effect for such funds.

This board may invest any money coming into the hands of the district in investments as permitted by Idaho Code Section 67-1210 pertaining to the investment of idle or surplus monies and Idaho Code Section 57-101, et seq., pertaining to designated depository.

The Board shall designate the District's Treasurer to manage investment funds in accordance with this policy in the priority order of safety, liquidity, and yield. The Treasurer shall refrain from personal business activity, which could conflict with proper execution of the investment program. The Treasurer shall disclose to the Board any material financial interests in any qualified institutions that conduct business with the Board or the District and they shall further disclose any material personal financial investment positions that could be related to the performance of the District's investment program.

The Treasurer shall invest and manage all funds (except from debt when other indentures apply) under the direction and control of the Board with the objective to minimize risk, maintain liquidity, and maximize yield. The foremost objective of this investment program is the safety of the principal of funds. The District will achieve this objective by minimizing credit risk and interest rate risk.

CREDIT RISK

The District will minimize Custodial Credit Risk, which is the risk of loss due to the failure of a security issuer or backer, by limiting investments to the types of securities listed in this investment policy, and prequalifying the financial institutions, brokers/dealers, intermediaries, and advisors with which the District will do business.

The District will minimize Concentration of Credit Risk, which is the risk of loss attributed to the magnitude of the district's investment in a single issuer, by diversifying the investment portfolio so the impact of potential losses from any one type of security or issuer will be minimized.

INTEREST RATE RISK

The District will minimize Interest Rate Risk, which is the risk that market value of securities in the portfolio will fall due to changes in market interest rates, by structuring the portfolio so the securities mature to meet cash requirements for ongoing operations; thereby avoiding the need to sell securities in the open market, and investing operating funds primarily in shorter-term

securities, liquid asset funds, money market mutual funds, or similar investment pools and limiting the average maturity in accordance with the District's cash requirements. The funds shall be managed such that they are available to meet reasonably anticipated cash flow requirements.

YIELD/RETURN ON INVESTMENT

Investment portfolios shall be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the investment risk constraints and liquidity needs. It is understood that return on equity is of secondary importance when compared to the safety and liquidity objectives described above.

FOREIGN CURRENCY RISK

The District will not invest in investments denominated in foreign currency, and the potential risk of loss arising from changes in exchange rates.

Only firms meeting the following requirements shall be eligible to serve as "Authorized Institution":
