

PROFESSIONAL STAFF DEVELOPMENT PLAN POLICY

It is the policy of the Mountain Home School District to support the important connection between educator professional development and improved student achievement. Mountain Home School District will establish a professional development plan, which will provide professional and paraprofessional staff members opportunities for professional development that advance their ability to work effectively with students via local, state, and federal standards. These professional development opportunities will focus on the continuous improvement of curriculum, instruction, and assessment that are aligned with local, state, and federal standards.

FUNDING OF PROFESSIONAL DEVELOPMENT

The district will spend no less than five percent (5%) of the Subpart A funds received under Title I on professional development.
